

La iesirea de la scoala baietii trec printr-un parc

Baietii "cuminti" urmeaza secventa Good\_Seq: in parc isi cumpara o inghetata  
merg linistiti prin parc si apoi arunca hartia la cos.

Baietii "rai" urmeaza secventa Bad\_Seq: intra in parc, dau cu pietre  
intr-un caine fara stapan, se stropesc intr-o balta si arunca gunoaiile  
in iarba parcului.

Doua valori de tip Static sunt definite in Sequences: timpul Route Time pentru a ajunge la modul si Process Time -timpul consumat in modul.
